

OVERLAND ROUTE STATIONS AND MILEAGE
SOURCES USED BY COMPILER

The following documents were found in the records of the Southern Pacific Engineering and Public Relations Departments. Additional copies of some timetables after 1973 were provided by John R. Signor of Dunsmuir, CA. In addition Mr. Signor has almost all of the documents listed below as does the California State Railroad Museum in Sacramento, CA.

In using this schedule bear in mind the dates of the station books and timetables are later than the actual installation or abandonment dates or changes in mileposts. In a few instances the actual date is shown when it was written in by the holder of the book or it was found on an engineering profile or station track plat. Thus, Tannery Switch, one mile east of Sacramento, is shown as "Out" in the 06/01/90 station book but the actual date was somewhere between the previous book, 03/01/88, and the 06/01/90 book.

While I was at SP I had a card file index of all stations, which was kept up by the Engineering Department, microfilmed and copies furnished the California State Library in Sacramento, Huntington Library in San Marino, CA, and two others whose names I now cannot remember. These cards showed much detail about each station and as I recall included dates of establishment and abandonment, mile posts, etc. These cards were destroyed by an individual in Engineering while I was out of town on business.

Document	Date	Location
Central Pacific Timetable #19	11/07/1866	Sacramento to Alta
Ibid #22	02/18/1867	Sacramento to Cisco
Ibid #28	06/18/1868	Sacramento to Reno
